SUMMARY

I'm a web developer who enjoys building useful applications and exploring how technology can solve real-world problems. Alongside web development, I have a strong interest in Artificial Intelligence and continuously spend time learning new AI tools, frameworks, and technologies. I enjoy adapting to new challenges, picking up skills quickly, and finding practical solutions to complex problems. Whether working independently or as part of a team, I focus on writing clean code, learning continuously, and contributing to projects that make a meaningful impact.

EDUCATION

BE CSE

Jayaram College of Engineering and Technology, karattampatti

2022-2026

HSC

Government Higher Secondary School, Valadi

2021-2022

SKILLS

- HTML 5
- JAVASCRIPT
- CSS 3
- PYTHON

PROJECTS

■ Multilingual Sentiment Analysis for Amazon Reviews

OCT 2024-DEC 2024

Developed an advanced multilingual sentiment analysis model to classify Amazon product reviews as positive, negative, or neutral across multiple languages. Used mBERT (Multilingual BERT) and VADER for hybrid sentiment scoring, achieving over 90% accuracy in multilingual testing. Implemented text preprocessing techniques such as tokenization and stopword removal, and visualized insights using Matplotlib and Seaborn. Deployed the model on AWS Cloud to enable real-time analysis and help businesses better understand customer opinions and product performance.

■ Smart Medicine: AI Chatbot for Personalized Treatment Support

Jan 2025-Jun 2025

Built an AI-powered healthcare chatbot to assist users by analyzing symptoms and providing personalized treatment recommendations. Applied NLP techniques and Deep Learning models using PyTorch for intent recognition and response generation. Integrated a Flask-based web interface for user interaction and improved response accuracy through continuous feedback and retraining. The project enhanced healthcare accessibility, real-time medical support, and user engagement while ensuring privacy and data security.

CERTIFICATES

1. Experience Based Project Learning By Naan Mudhalvan.
2. Robotic Process Automation By Naan Mudhalvan.
3. Salesforce Developer By Naan Mudhalvan.
4. Full Stack Web Developer By Don Bosco Tech Followed By The Duration 39 Days.
